UTSAV CHAUDHARY

Texas | utsavmaan28@gmail.com | (607) 296-9583 | thatinsaneguy.com | in/utsavmaan28 | github/UttU28

Senior **DevOps Engineer** with **~5 years** architecting and operating **production grade AWS and Azure infrastructure** for high availability systems. Own infrastructure lifecycle management including **Kubernetes** orchestration, **Infrastructure as Code** with **Terraform** and **Ansible**, and **multiple environment deployments** across Dev, Test, UAT, QA, and Production. Established **observability strategies** with **Prometheus**, **Grafana**, and **ELK stack**, implementing comprehensive monitoring, alerting, and incident response. Experienced in hybrid cloud architectures, **cost optimization**, & **security best practices**. Proficient in **Linux administration**, **Python/Bash scripting**, & **CI/CD pipelines** with **Jenkins**, **GitHub Actions**, and cloud native solutions.

Technologies

Cloud & Infrastructure: AWS (EC2, EKS, Lambda, RDS, S3, VPC, IAM, CloudWatch, API Gateway, Secrets Manager), Azure (App Services, AKS, Azure DevOps, Azure SQL), Docker, Kubernetes, Helm

IaC & Automation: Terraform, Ansible, Bash, Python, PowerShell, YAML, CloudFormation, Nginx, Cron

CI/CD & Version Control: Jenkins, GitHub Actions, Bitbucket Pipelines, AWS CodePipeline, Azure DevOps, Git, Artifact

Monitoring & Logging: Prometheus, Grafana, Elasticsearch, Logstash, Kibana, CloudWatch, Application Insights

Networking & Security: VPCs, Security Groups, IAM Policies, DNS, VPN, LDAP, RBAC, SSL/TLS, OAuth 2.0

Development & Tools: Python, TypeScript, JavaScript, FastAPI, Node.js, React.js, Next.js, REST APIs, WebSockets, PostgreSQL, MongoDB, Redis, Firebase, Kafka, Jira, Confluence

Operating Systems: Linux (Ubuntu, CentOS, RHEL), Windows Server, macOS, Raspberry Pi, Arduino

Experience

DevOps Engineer, Hybrid, Labs196, TX — Jan 2024 - Present

- Own production grade **AWS EKS infrastructure**, architecting high availability **Kubernetes clusters** with **Helm** deployment strategies, ensuring consistent environment parity across **Dev**, **Test**, **UAT**, **QA**, and **Production**.
- Established infrastructure reliability through **Terraform** and **Ansible** governance, managing **VPCs**, **security groups**, **IAM policies**, and **RDS** lifecycle across multiple environment infrastructure with version controlled IaC.
- Led observability strategy implementing **Prometheus**, **Grafana**, and **CloudWatch** for centralized logging, real time performance dashboards, and automated alerting, enabling rapid incident response and maintaining **94% SLA** compliance.
- Architected production **CI/CD pipelines** using **Bitbucket Pipelines** and **AWS CodePipeline**, reducing deployment cycles by **40%** with automated testing, staging gates, and zero downtime production rollouts.
- Implemented **RBAC** governance, **IAM policy** enforcement, and security group hardening across all environments.
- Participated in on call rotations and incident response, creating runbooks and collaborating across teams to resolve infrastructure issues while maintaining production reliability.

DevOps Engineer CO-OP, Midh Technologies, TX — June 2023 - Dec 2023

- Managed production infrastructure for ML workloads, supporting **GPU backed Kubernetes clusters** on **AWS EKS** with cost optimization strategies including node pool configuration, resource quotas, and auto scaling policies.
- Designed high-performance inference infrastructure deploying **FastAPI** endpoints behind **AWS API Gateway** with **IAM authentication**, request throttling, and **Lambda** integrations for scalable ML inference.
- Developed infrastructure automation through **Ansible playbook** development, reducing manual server configuration and deployment time by **50%** while ensuring configuration consistency.
- Built production **CI/CD pipelines** with **GitHub Actions**, automating testing, Docker image builds, security scanning, and deployments to **AWS Amplify** and **EKS** environments.
- Implemented infrastructure security practices including **RBAC** policies, **IAM role** management, and **VPC** security configurations across AWS services and application layers.

DevOps/Platform Engineer, Compendious Medialabs Pvt. Ltd., IN — June 2021 - July 2022

- Managed hybrid infrastructure for **on premise Linux servers** (Ubuntu) with containerized deployments using **Docker**, establishing infrastructure reliability and automation through **Bash** scripting and configuration management.
- Designed and implemented self hosted CI/CD infrastructure deploying **GitHub Actions runners** on local infrastructure, building production grade pipelines for automated testing, Docker builds, and multiple environment deployments.
- Established production grade reverse proxy infrastructure with **Nginx** and **SSL/TLS** termination, optimizing external service exposure with **250ms** average response time and high availability.
- Implemented observability strategy deploying **Prometheus** and **Grafana** monitoring on local infrastructure; automated infrastructure tasks with **Python/Bash** scripting, reducing manual operational overhead by **60%**.

Software Engineer / DevOps Remote, VRoKCs, MO March 2020 - Sept 2020

- Managed production infrastructure on **Azure**, deploying **Flask web applications** on **Azure App Services** with high availability configurations, auto scaling, and integrated monitoring.
- Built infrastructure automation through **Azure DevOps** pipelines for ML model deployment, implementing artifact storage with **Azure Blob Storage** and version control workflows.
- Designed containerized infrastructure using **Azure Container Instances** and **Docker** for ML inference services, ensuring environment parity between development and production with consistent deployment practices.
- Developed CI/CD infrastructure using **Azure DevOps** for ML lifecycle management, automating training and deployment workflows and reducing deployment cycles by **40%** through pipeline optimization.

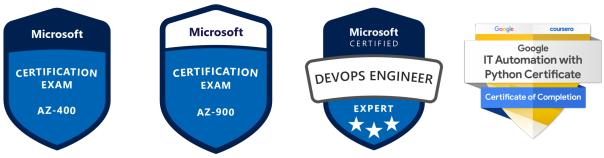
Web/Game Developer, underDogs Gaming Studios, IN March 2019 - Aug 2019

- Contributed to backend API infrastructure for gaming services, integrating and optimizing **Quarters API** across multiple games with secure transaction, supporting **load balancing** and **API rate limiting** for high availability systems.
- Supported infrastructure reliability initiatives by optimizing real time client server communication, validating and refining backend interaction flows using **Python** and **C#**, implementing error handling and health monitoring.
- Developed unified transaction infrastructure connecting external services (**payments**, **inventory**, **shipping**) to internal game systems, following consistent API patterns and infrastructure best practices.
- Participated in infrastructure security and testing practices, implementing **API security best practices**, comprehensive logging, and integration testing frameworks for edge cases including payment failures and network resilience.

Education

State University of New York at Binghamton Aug 2022 - Dec 2023
Master of Science in Computer Science 3.44/4.00 GPA

Certifications



Microsoft Certified: DevOps Engineer Expert View Credential
AZ-400: Designing and Implementing Microsoft DevOps Solutions
AZ-900: Microsoft Certified: Azure Fundamentals
Google IT Automation with Python - (Specialization) View Credential
