Dear Hiring Team,

I am a **Sr. Python Blockchain Developer** with **5+ years** building Python services, data pipelines, and cloud platforms across AWS and Azure. I am writing to express my interest in joining your team and contributing to reliable, data-driven product work.

In my current role at **LABS196 Innovations**, I work as a **Sr. Python Blockchain Developer** supporting multicloud lab and research services — **Python**-backed workloads on **EKS/AKS**, GitOps, and production observability in **GxP-validated** environments.

Before that, at **Finix196 Capital**, I was a **Data Science Specialist** building **Python** and **Azure Databricks** pipelines for RWA tokenization analytics. There I contributed to:

- **Bronze/Silver/Gold ETL** for investment funnel, KYC/SLA, and funded-volume metrics
- **Data quality** gates (dedupe, schema validation, quarantine) for trustworthy Gold KPIs
- **Azure DevOps** promotion of transform jobs with monitoring so overnight failures were caught early

I do my best work when clean data, reliable pipelines, and clear metrics are treated as product features. I would be glad to help your team ship analytics and blockchain-adjacent systems that stakeholders can trust.

Personal Projects & Portfolio

Outside of work, I stay sharp by building and running my own systems. Portfolio: thatinsaneguy.com. I also document projects on YouTube at @ThatInsaneGuy.

- **Apeksha Home Lab** (apeksha.thatinsaneguy.com): self-hosted stack with Docker Compose, nginx, Certbot TLS, one-command deploy scripts, FastAPI health dashboard, and a Kubernetes lab on kind.
- **LinkedIn Reverse Search** (linkitup.thatinsaneguy.com): Python data pipeline with Docker and GitHub Actions CI/CD.
- **AI Video Pipeline** (meme.thatinsaneguy.com | GitHub): automated ML and FFMPEG pipeline with Docker and scheduled publishing. Demo on YouTube.

Certifications

- **Microsoft Certified: DevOps Engineer Expert (AZ-400)**
- Azure Fundamentals (AZ-900)
- Google IT Automation with Python

Thank you for your time and consideration. I would welcome the opportunity to discuss how my platform experience and hands-on project work can support your team.

Best regards,
Utsav Chaudhary
